FINANCIAL AND COMMERCIAL TURSDAY, June 16-6 P. M.

The gold market has been very strong and excite to-day under the increasing scarcity of coin, aggra-vated by the efforts of speculators for a rise. It is therefore to be hoped that the Treasury will at once increase the floating supply of gold by cashing the July coupons on presentation. Up to the adjournment of the board the fluctuations were from 140% to 140%, with the closing transactions at 140%; but subsequently the quotation advanced to 140% a 141, mainly in consequence of apprehensions among the bears and a belief among the bulls that coin will be in still more limited supply to-morrow, owing to the locking up operations of the clique concerned. Loans were made at rates varying from two to fourteen per cent per annum for borrowing, and at 1-32 a 1-64 per diem, as well as without interest; but late in the afternoon engagements for Wednesday were made at still higher rates. The gross clearings amounted to \$55,795,000, the gold miances to \$2,143,698, and the currency balances to \$3.229,781. The steamer Germania took out \$650,000 The "short" interest outstanding appears from the extent of the borrowing demand to be large, and the firmness of the market of late has uneally been a source of considerable disappointment to the bears; but this is the natural result of legitimate causes affecting the premium, whereas the "squeeze" which is now being felt is partly artificial, and in so far as it is so the speculators responsible for it are to be condemned nd if possible checkmated. There is no probability of any other than a firm market for gold while the drain of specie to Europe continues, but all speculative efforts to make it artificially scare are productive of evil to the importing community and sympathetically to the people at large, as the effect upon the price of gold is for the time being always of a disturbing character. The shipments of gold from an Francisco in May aggregated \$2,699,677, against \$1,878,780 in the corresponding month last year. of the total amount of the July interest on the public debt and railway bonds and the dividend on Illinois Central stock it is estimated that about en millions will be due to parties in Europe, while the bonds of 1868, which mature on the 1st proximo, are mainly held there: but as the Treasury has the eption of paying the bonds in question at any time after their maturity, by continuing to pay the interest on them, it may be that these will not be called n for redemption immediately upon their maturity. It does not follow, however, that the amount draws here on European account will be remitted in specie, ut, on the contrary, it is probable that a large portion of it will be reinvested in United States bonds.

The railway share market has been very dull but

firm all day, although no material change in quotations took place. Reading and the Western stocks showed the most marked tendency towards improvement, while Erie and New York Central were without buoyancy, notwithstanding that a settlement between the Eric and Vanderbilt parties is probably not remote. Money was just as abundant as it has been at any time since the commencement of the present glut. and first class stock houses had no difficulty in borrowing all they required at three per cent, although the rate generally asked on miscellaneous collaterals was four. There is very little commercial paper offering, and the best grade is scarce and in demand at 5 a 6 per cent. In the West the local centres are well supplied with funds, and loans on call are made at Chicago at six per cent, a significant fact when we consider that the usual rate is ten. There is no probability of any abatement of the prevailing monetary ease until the end of August, and meanwhile the banks will be forced to employ much of their surplus in the purchase of government securities, the demand from speculative and mercantile sources being entirely madequate to the absorption of the idle capital of the country. The national banks will make up their quarterly returns on the 1st of July, but their condition is such that they stand in no need of making any special preparations for the same, and hence no bing effect whatever upon the money market, here or elsewhere, is to be looked for. The virtual defeat of the new Tax bill in the House of Representatives yesterday is so far satisfactory, because the latter was entirely too cumbersome and compli-cated to be consistent with the public welfare. The Committee of Ways and Means are now engaged in preparing a new amendatory bill taxing whiskey and tobacco, and there is scope for their ingenuity in devising ways and means enforcing the collection of the whiskey tax. The present tax is not any higher shan it ought to be, but as it has been found impossitie to collect it by the machinery now in force, a reduction of the tax to one dollar per gallon might be tried with possible advantage. The proposition to reduce it to sixty cen's should, however, be re

for United States stocks all day, although a fractional reaction from the advance of \cdot_{i} a \cdot_{i} per cent which followed the opening was experienced in the early part of the afternoon. The demand both for home investment and on foreign account was large, and the rising tendency of the exportable bonds was particularly marked. Confidence in the public credit is growing, owing to the improved condition of the national figures and the fact of all but a small amount of the seven-thirty notes having been already funded. With respect to the revenue no apprehensions whatever of a deficiency need be entertained, and there is no country in the world where the people have shown such substantial patriotism as they have in the United States, and where taxes, however onerous, are so willingly paid. If necessary a far larger amount of revenue than is now collected might be raised; but this should not check efforts being made towards a simpufication of the tax law and a reduction of the pubhe expenditures. The new five-twenties of 1868 are new being issued in exchange for seven-thirty notes. and this afternoon they were quoted at 100% a 100% The disbursement of about thirty-two millions in com interest by the Treasury on the 1st of July and eight millions more in redemption of the principal of maturing bonds will doubtless largely stimulate the investment demand on both home and foreign account, and the simultaneous payment of thirty millions more in currency of interest and dividends by banks and other corporations throughout the country will operate materially in the same direction. The stoppage of the supply of bonds by the closing of the gold loans will at the same time add to the excitement and buoyancy produced by this heavy demand, and our national securities will permanently rise to higher figures than they have hitherto been quoted at. At the close the market for all the issues was strong at the subjoined quotations:-Registered, 1881, 111% a 112%; coupon, 1881, 117% a 117%; 5-20's, registered, 1862. 109% a 109%; 5-20's, coupon, 1862, 112% a 113%; do., 1864, 110% a 111%; do., 1865, 111 a 111%; do., 1865, January and July, 113% a 114; do., 1807, 114 a 114%; do., 1868, 100% a 109%; 10-40%, registered, 106% a 106%; 10-40's, coupon, 106% a 106%; June 7.30's, 109% a 110; July 7.30's, 110% a 111; August compounds, 1865, 118 1; September do., 118; October do., 117%

At the commencement of business the stock market was dull but firm, and at the early session of the open board prices were slightly higher in some instances than at the close last evening. Reading selling at 98% and Cleveland and Pittsburg at 88%. At the first regular board there was increased activity, but no material change in prices, and New York Cent at closed is lower than at the same time yeste day, Eric & Michigan Southern & and Cleveland and Toledo %, while Cleveland and Pittsburg was 36 higher, Bock Island %. Fort Wayne 1/2 and Western Union Telegraph %. Government securities were very strong and active at an advance of % a % per cent. At the open board at one o'clock the transactions were light, and Reading sold at 9814 and Eric at 69%. At the second regular board the market continued dull, and Cleveland and Pittsburg closed is lower than at the first regular board, Cleveland and Toledo %, Northwestern 4, do, preferred % and Quick-liver %, while Michigan Southern was % higher and Rock Island M. State stocks were Ma % higher, under the manipulation of speculators who wish to make a market on which they can sell out at a profit; but all the bonds of this class are selling for more than they are worth under existing circumstances, and therefore there is no inducement for the public to invest in them. Covernment securities were steady at a decline of an eighth and in two instances a quarter per cent from the highest point of the morning. At

the open board at half-past three there was a fractional improvement in some of the leading rail-way shares; but the market was inactive and remained so during the rest of the afternoon, and at the close at five o'clock the quotations were as follows:-New York Central, 134% a 134%; Erie, 69% 1 69%; Reading, 98% a 98%; Michigan Southern, 89% a 96; Cleveland and Pittsburg, 88% a 88%; Cleveland and Toledo, 106% a 106%; Rock Island, 105% a 105%; Northwestern, 70 a 7014; Northwestern preferred, 83¼ a 83¼; Fort Wayne, 111¼ a 111½; Pacific Mall, 97¾; Ohlo and Mississippi, 20¼ a 20½; Western Union

Telegraph, 37% a 38. The foreign exchange market was firm, notwithstanding the scarcity of cash gold and the advance in the premium, and the leading drawers asked 110% for their sterling at sixty days. The supply of commercial bills continues very light, and bankers' bills on England at sixty days were quoted at 110 a 110%; at three days, 110% a 110%; commercial bills, 109% a 1091. Bankers' bills on Paris at sixty days, 5.15 a

Consols and American securities were quoted thus in London to-day and on the previous dates men-

Of foreign the sales are 120 bales Smyrna (unwashed) at 15c, gold, and, to arrive, 199,000 lbs. Rio Grande at 235c, a 235c, gold.

COMMERCIAL RECORD.

CAPETOWN, April 18 .- Advices from here of this date represent business as exceedingly duli and without any pros-pect of improvement. We quote from the local commercial pect of improvement. We quote from the local commercial journal:—"Shipment of colonial produce from Table Bay during the last few weeks has been scarcely worthy of men-London with copper or and produce, for which she obtain the large term of the control of the least of the large term of tion. In freights but little is doing. The Cambrian took cargo at the ordinary steam rates. The Ocean King is loading for

dealers confining themselves entirely to the purchase, in small quantities only, of articles in constant consumption. Under these circumstances stocks of goods in second hands are very stem to had the process of the process of the state of

THE TOBACCO TRADE.

Report for the Week Ending June 16.

The tobacco market has been moderately active during the past week. Kentucky has been selling at previous rates (8½c. a 18c.), but the excitement regarding this article noticed in our last report has subsided. The sales of the week amount to nearly 1,200 hhds., among which we notice 200 hhds. ordinary old light lugs at 9½c. for Spain; 75 cases of new crop Connecticut seconds are comprised in the above sales. The demand for seedleaf runs for fine, faultiess wrappers and good sound fillers and binders, both for home trade and export. The former are very scarce and would meet with ready sale. Medium tobaccos, of which there are large quantities on hand, are neglected. In Havana tobacco transactions have been limited to 250 bales, mostly fillers, at from 90c. a §1 10. Good Havana fillers are in demand. 50 hhds. Virginia were disposed of at 9c. a 12c. Nothing has been done in Maryland and Ohio.

REAL ESTATE MATTERS.

Sales of New York and Brooklyn Property

Yesterday.

The week opened yesterday with a fair amount of The week opened yesterday with a fair amount of business at the Exchange and a large attendance. The auctioneers selling were A. J. Bleecker, Son & Co.; James M. Miller, Muller, Wilkins & Co., and Jos. McGuire. The first mentioned firm, besides offering some uptown lots, conducted a sale by order of the Supreme Court, under the direction of a referee. of valuable improved property on Pearl, Stone, Bay ard, Water and Canal streets, and a one-thirtleth in terest in lot No. 212 Broadway, northeast corner of Fulton street, all of which was disposed of. The sale by James M. Miller was likewise a legal sale, so termed—viz., "in partition" legal sale, so termed—viz., "in partition"—
the property being located in Brooklyn; as was also
that of the last named house, of improved and unimproved property in this city, "by order of executors." Beyond these "legal" sales but little is
doing at auction now in New York property, nor
likely to be for the next few months. Suburban lots
and villa sites, however, still proclaim their several
attractions to capitalists and speculators in
lengthy advertisements and elaborately finished
maps, and considerable activity is looked for in
this description of property. We have already advertised some very extensive sales of the last
mentioned, announced to be held on the
ground, preparations having been made for
a grand excursion thither, with the accessories
of a free ride and a free lunch. That holders
thus invite a personal examination of the
several localities which they wish to sell, by those
whom they desire to become bidders and purchasers,
gives an assurance of the existence of the various advantages they represent them to possess, which will
doubtless operate to their advantage. The first of
the sales answering to the above enumerated conditions will be held on Thursday next by A. J.
Bleecker, Son & Co., of four hundred plots, about
three thousand city lots, at Rutherford Park, on the
Eric Railroad, about nine miles from the City Hail.
New York. Thus the increasing expansion of the
metropolis is felt equally in New Jersey in the appreciation of real estate as in Brooklyn.

Bidding at the sales yesterday was prompt an
spirited and prices well maintained. Notwithstanding the rain real estate continues firm. Below we
give particulars:—

Vexatious Proceeding in Regard to the Key West Fishermen-Arrest of a Revenue Collecter-Havana About to Raise a Lean-Bank Statement.

HAVANA, June 10, 1868.

tive manifestation of Spanish ill will and dislike in the execution of an order requiring the fishing smacks, coming here almost daily from Key West and other near American ports, to be remeasured every year. This entails an expense to the "poor fishermen" of \$84 to \$51 to each smack, thus form ing another burden on their trade. It would appear ing business of this city, not only to the injury of the hermen, but also to that of the poorer natives. Whether it is done to obstruct regularity in the com munication between the two points, and thus dimin-ish the telegraph business, which is not permitted to pass from this end of the cable, can only be sur-

Recently a number of the citizens of the jurisdiction of Pinar del Rio complained to the Captain General of the preposterous exactions of their Collector of revenues, Don Jorge Couder. A commission was appointed to investigate the truth or falsity of the complaints preferred, and the immediate result of the report just handed in has been the arrest and confinement in the city jail of the collector, who

sult of the report just handed in has been the arrest and confinement in the city jail of the collector, who will have to answer before the high court of justice for his abuse of power and over charges.

In pleasing financial contrast to nearly all of the Cuban cities stands that of Colon, whose municipal authorities announce a balance on hand of \$50,000, all expenditures paid. The officers of the place should be sent to the several cities whose authorities are floundering in the mire of indebtedness, so as to there inangurate systems of economy and retrenchment.

It is reported here that the City Governor is trying to negotiate a loan of five millions, to clear up debts which now foot up a very considerable amount, and will consume in their liquidation most of the sum to be borrowed. Nearly all of the minor officers here are said to have been three to four months without their pay, but it is not stated that these include the City Governor himself.

The districts of Santiago de Cuba and Puerto Principe have just been over-blessed with a superabundance of rain. In the latter the heavenly clouds poured down their contents for four days without intermission. Great injury has in consequence resulted to the plantations of both districts. A telegram was received yesterday from Santiago for the HERALD, stating that the rivers were impassable and many estates completely inundated.

According to the statement which the Diario de la Marina publishes monthly of the situation of the principal banks of Havana, on May 31, the aggregato result, as compared with that of same date last year, is as follows:—Increase in cash accounts, \$1,196,449: bills receivable, \$3,067,783, and in the non-bearing interest deposits, \$2,090,207; decrease in deposits on interest, \$46,288: loan account, \$989,692, and in share account, \$3,156.

Mr. Alfred Paul has returned here the second time from New York, finally to take charge of the French Consulate. Marquis de Janson has again change?

Mr. Alfred Paul has returned here the second time from New York, finally to take charge of the French Consulate. Marquis de Janson has again charged his mind, and once more concluded to avail himself of his leave of absence and visit la Belle France.

To-morrow is a strict holiday, when, in celebration of the feast of the Santistimo Corpus Christi, the Captain General and all the other dignitaries will be present at the cathedral, together with the troops of the line and the volunteer corps.

Reported Plan to Attack Cuba-Peruvian Monitors to Make a Descent from New Orleans-Cholera-Markets.

MATANZAS, June 10, 1868. To-day it is reported here that telegraphic advices received from New Orleans announce the approaching departure from that city of two Peruvian monitors to attack the north side of Cuba.

Another report, given with much more positive ness than the first, is, that a cargo of African black

ness than the first, is, that a cargo of African black has been landed at Enseñada de Cochino, in the jurisdiction of Colon, only a few days ago. Quien sabe?

The endemic choiera is again appearing here and with increased severity. A good many cases have taken place within the past week, many of which proved fatal. Our health officers did nothing to protect the city against the terribic invasion; and now that it is in our midst they do equally as little to prevent its spread.

The sugar market is quiet but firm at \$\frac{1}{2}\$ are, per arrobe for No. 12, and 7\frac{1}{2}\$ as 7 s. for fair to good refining muscovadoes. Molasses firm at 5\frac{1}{2}\$ rs. for clayed and 6\frac{1}{2}\$ a 6\frac{1}{2}\$ is. for muscovadoes; sine of 30 hids, at the latter rate. Freights quiet at \$4 50 per 110 gallons molasses, \$5 50 a \$8 75 per hid, sugar, and \$1 75 per box. Tonnage in fair supply.

HONDURAS.

Money Scarce-The Free Port of Coxen Hole-Rates of Port Dues. TRUJILLO, May 24, 1888.

Letters received here from Comayagua and Tegucipalpa complain very much of the paralyzation of commerce and the searcity of money, but the sanitary condition of the two places was excellent, and, like in the rest of the republic, perfect peace prevailed. Our national Congress has passed a law changing the name of Coxen Hole, Ruatan Island, to Medina in compliment to the President, and making it an open in compliment to the President, and making it an open free port. All vessels, national and foreign alike, will only have to pay a port duty of one dollar, when not of a burden beyond one hundred tons; two dollars when between one and two hundred tons, and three dollars when above the last enumeration. Merchandise introduced for re-exportation will have to pay a very small duty in aid of the maintenance of the government of the place, while the merchandise and goods brought for home consumption will pay such duties as will hereafter be prescribed by an executive order, issued after consultation with the Legislature of the island. The citizens of the place now hope for a greatly increased trade, particularly with the United States.

The health of Trujillo continues good. The visit of our worthy President is still anticipated.
